BELLEVUE, IDAHO July 21 1909

Mr. Stanley A. Easton,
Kellogg, Idaho

Dear Mr. Easton:

I want to thank you very much for your letter of the 16th. Your letter has put me way back on the back seat. I can't follow you with a 6 ft. Anaconda Huntington, as it's capacity is nearly three times our requirements, and the ordinary type of a Huntington is of course is a nuisance and a damnation. With only 40 or 50 tons of this regrind stuff per day, I must admit the position is embarrassing. I wish I were a year or more behind you after you have tried out your Chili mill. But I am tampering with the Hardinge Conical Mill and the Ferraris Ball Mill, and if I could believe 10% of what they say, I would have no difficulty in making a choice. The Monadnock type of Chili mill is claimed to be just right etc.

However, we will sweat it out somehow, and I thank you again for your letter and you can expect me to blow in there some day after your new mill is all lined up.

Sincerely,

Idaho Consolidated Mines Company, Ltd.

Irvin E. Rockwell
GENERAL MANAGER.
